			the intervals between individual take-offs were 10 to 20 minutes;
	RO June		Type 27 jet bombers made 10-minute flights. The minus
		25X1 25X1	took off at intervals of about five minutes.
	11 0	25/(1	Type-27 and 30 jet bombers practiced flying between 8 a.m.
			and noon, and 2 and 6 p.m. Individual flights and formation flying in groups of two and three were observed. The
		0EV4	Hights lasted from 10 to 20 minutes. The weather was
		25X1 25X1	partly cloudy; visibility was good.
	32 n		No flying observed in spite of favorable weather.
	13 "		There was flying from 8 a.m. to 5 p.m. and 9 to 12 p.m. Ouring the day, individual flights and formation flying in
			groups of two and three were observed as on 11 June. The
		25X1	olanes involved took off at intervals of 3 to 20 minutes.
	II. W		From the noise of aircraft engines, source inferred that flying was conducted between 8 and 9 a.m.
	15 °		No flying
	16 "		There was individual and formation flying in groups of up to three jet bombers between 8 a.m. and noon. For formation
			flying, the planes took off at intervals of about 100
			meters, assembled in the air and landed individually after circling once over the field. The flights lasted from 15
		25X1	to 20 minutes.
	27 "	25X1	A total of 31 type-27 and 30 jet bombers was counted at the
	-		field; another two or three such bombers were observed.
	3.8 "	25X1	Individual jet bombers circled over the field between 7 and 11 a.m.
		25X1	
7.	A PKV 45 D)F station w	was observed about 1,000 motors from the eastern end of the
	runway. Th	oree radio m	masts, two temporary wooden buildings and a lean to for the
			were seen about 150 meters from the DF station. (4) East of on with three masts there was a searchlight oriented toward
			spotlights placed at intervals of about 50 meters at a height rs and oriented toward the runway extended from this searchlight
	to the rur		rs and oraniood bonard bie runnay expended from ours searchings
8.	During the	narioù fro	om 9 through 15 June, 200 men wearing red-bordered black
O.s.	epaulets v	with artille	ery insignia arrived at the Werneuchen railroad station and
		tered at the	e field. 29 g equipment arrived at the installation. About 40 men wearing
	red-border	red black ep	paulets with artillery insignia arrived at the Merneuchen
			16 June. Hore officers and EM wearing red-bordered black n town than air force soldiers. (6)

	∟ 15.	During the period from 17 May through 23 June, 109 railroad tank cars, 725
		Elatears loaded with gravel, 120 flatears and 5 boxears the loads of which were not determined arrived at the installation. (11.)
25X1	Г	Commande
25/(1	(1)	Bombs of this size are reported for the first time. Although the measurements
		stated are only estimates and therefore must be received with reserve, it is believed that the bombs observed were larger than the previously known 1,000 kg
	(2)	bombs. Efforts have been initiated to obtain more exact information. This type of tank truck is reported for the first time. For sketch of the truck
	-	with trailer, see Annex.
		This officer is reported for the first time. According to available information, a low frequency landing beacon is located
		on this spot. It is believed that source's statement on the three masts of this installation was an error in observation and that actually only one guyed mast
	/e'\	existed there.
	(5)	The existence of this row of spotlights in the extension of the runway as far as the inner low frequency landing beacon was known previously. Such rows of spotlights, which are used to facilitate night landings, have also been observed
	(6)	at other airfields in the Soviet Zone of Germany. The soldiers wearing red-bordered black epaulets were Abb personnel. It is
	(~)	believed that the AAA batteries, which arrived at the field after about 12 April
•		1952, are being grought up to full strength. The soldiers belonged to an A.A unit from Brandenburg, which is directly assigned to the GOFG.
25X1	(7)	This item of information indicates that contrary to a provious report the northern taximay will not be completed by 15 July.
	(8)	The fuel tanks reported may have a total storage capacity of 2.4 million liters. This would roughly correspond to the total fuel storage capacity reported for the
		Brand airfield. It may be assumed that these two airfields, which are occupied
		by bomber units, are provided with about the same facilities. The fuel storage capacity reported for the two fields, which is five times the capacity of the
		other airfields in the Soviet Zone of Germany, indicates that they may be earmarked for use by multiple-engine conventional or jet bombers.
25X1	(9)	
25X1	(50)	
	(LL)	The data on the railroad tank cars arriving at the field during the period reported agrees with available information. It is believed that source covered
		all fuel shipments dispatched to the installation. The large amount of gravel, shipped to the field indicates that construction work on the northern taxing
		of the field is to be intensified.
